

Approaches to Learning Activity for 30 to 36 Months

Tower Power Game

This activity encourages children to use their imagination and creativity. It also promotes fine- and gross-motor skills.

Materials:

- Assorted blocks, boxes, containers
- Toy cars
- Small plastic or wooden people
- Yarn

What to do:

1. Help the child create roads, bridges, houses, trains, and other items using the materials listed.
2. Encourage him to make roads using different lengths of yarn.
3. Encourage him to make his "city," "town," or "village" come to life.

Provide ideas to help the child create make-believe stories about his "city."
