

Approaches to Learning Activity for 30 to 36 Months

What Do You See?

This is a very creative game that is good to play during a walk outside or a ride in the car.

Materials:

- None

What to do:

1. Ask the toddler what she sees when you are walking outside or driving in a car.
2. Ask questions. If the child says that she sees a tree, you could ask: How big is the tree? What color is it? What do the leaves look like? Where is the very top of the tree and the very bottom?
